DESCRIPTION:

At the gates of Desenzano del Garda, in a quiet area surrounded by greenery and at the same time conveniently close to the train station, the main road connections, and all essential services, a brand-new residential district will be created. This ambitious project will begin in 2026, with delivery of the first housing units scheduled for the beginning of summer 2027. The development plan includes different types of housing solutions to meet every living need: independent single villas, four-family residences, and modern residential buildings with one-, two-, and three-bedroom apartments. The result will be a dynamic and harmonious context, designed to offer quality of life, comfort, and sustainability. In this listing, we present the model of the one-bedroom apartment, which will be available in the first residential building to be constructed. The building will consist of twelve units distributed over three above-ground floors, plus a basement dedicated to garages, with each floor served by two stairwells complete with elevators. Among the shared facilities there will also be a beautiful swimming pool area, designed to provide moments of relaxation and conviviality. The one-bedroom apartment is designed with modern and functional spaces: a bright living area with open-plan kitchen, hallway, windowed bathroom, and master bedroom. The ground-floor units will be enriched by a livable porch and private garden, while the upper floors will feature private terraces. The entire project is oriented toward a contemporary lifestyle, with particular attention to well-being and sustainability: eco-friendly, earthquake-resistant, and fully electric constructions, designed to reduce consumption and eliminate environmental impact. A unique and attractive opportunity, both as a personal living solution and as an investment. For further information and details, we remain at your disposal.
